

“ SEMEN ”

ALL of Tekoa's breeding males and females will be DNA tested, Hip Certified and double registered AKC and American Field with AVID Chip Implants in the near future.

All breeding males have frozen semen available.

Stud fees begin at \$700 for live cover or frozen semen.

For stud fees on individual males, see the Stud Dogs page.

LIVE COVER STUD FEES:

A “negative” brucellosis test on any female is required before breeding to a Tekoa Mountain Stud dog. This test must be performed within one month prior to arriving at Tekoa and the actual test result from an accredited laboratory must be supplied by fax or mail before the female arrives.

Stud services at Tekoa begin at \$700 (or pick of the litter) for any live cover. All stud fee arrangements are completed BEFORE the female arrives for breeding. If the female is shipped, a transportation fee to and from the airport may apply. (estimate of \$50 total) Boarding fees of no more than \$10 per day may also apply.

Any additional fees such as: vaginal smears, progesterone assays, or artificial insemination are the responsibility of the owner of the female. Any such additional fees are with prior approval of the owner of the female before breeding.

For stud fees on individual males, see the Stud Dogs page.

FROZEN Semen

Tekoa Mountain Kennels is fortunate to have the International K9 Semen Bank 15 minutes away!

International K9 Semen Bank of Oregon
11241 SE 362nd Avenue
Boring, Oregon 97009
503-663-7031 Fax / Office
E-mail: IK9SB@aol.com

This is a real convenience to Tekoa and any clients for vaginal inseminations, scheduling surgical implants, stud dog collections, storing and shipping frozen semen.

For stud fees on individual males, see the Stud Dogs page.

INSEMINATIONS or IMPLANTS - AT TEKOA:

Tekoa Mountain Kennels recommends vaginal insemination on any difficult females if being bred to a stud dog currently living. All other females can be easily live bred.

A surgical implant is recommended for all females being bred to a stud dog no longer living.

Vaginal Insemination (frozen semen): “Estimated Costs” \$300 to \$450
(does NOT include stud fee/pick of litter or shipping the female to and from Tekoa)

Surgical Implant (frozen semen): “Estimated Costs” \$750 to \$1000
(does NOT include stud fee/pick of litter or shipping the female to and from Tekoa)

INSEMINATIONS - SHIPPING SEMEN to the Owner of the female:

Vaginal insemination (frozen semen): “Estimated Costs” \$650 to \$1000
(does NOT include stud fee or transporting/boarding/fees for the female at Veterinary facility)

Surgical implant (frozen semen): “Estimated Costs” \$750 to \$1000
(does NOT include stud fee or transporting/boarding/fees for the female at Veterinary facility)

Chilled Semen: “Estimated Costs” \$1000 to \$1500 (Not recommended)
(does NOT include stud fee or transporting/boarding/fees for the female at Veterinary facility)

NOTE:

If pregnancy does not occur, return service for the female is recommended. There is also an option to substitute another female as a one time breeding choice.

The owner is responsible for all fees associated with shipping.

Any stud fee payments, brucellosis testing, health papers and negotiations for breeding must be made prior to the female arriving at Tekoa.

A negative brucellosis test on any female with prior breeding experience is required. This test must have been performed within one month of the breeding date, and the actual test result from an accredited laboratory must be submitted for Tekoa's files.

Tekoa remains flexible in working with all clients to provide the best possible service.

Special efforts are taken toward the care, transporting and breeding of all females.

Please contact Tekoa at ericmauck@aol.com with any questions about breeding females.

Thank you!
